

How Vodafone Italy Raised Conversions +42% by Developing Creative in a Radically New Way

For Vodafone, Words Matter.

Vodafone Italy approaches every marketing message as an opportunity to design exceptional customer experiences, win customer loyalty, and increase lifetime value.

Mobile push notifications and SMS are their primary digital communication channels and major growth engines for key business initiatives, making the messaging even more crucial. When words fall flat, Vodafone loses business.

Their Goals

INCREASE LTV with upsell and cross-sell campaigns that suggest additional services to current customers.

PREVENT CHURN with lock-in campaigns that offer high-value, hard-to-get customers convenient and exclusive packages.

WIN BACK FORMER CUSTOMERS with winback campaigns critical to growing market share.

ENHANCE CUSTOMER SATISFACTION with loyalty campaigns that encourage subscribers to engage with Vodafone's loyalty program and weekly prize draws.

The Impact of Persado AI

Since 2012, Vodafone has used Persado's unique AI platform to machine-generate marketing creative, gain customer analytics, and elevate the success of their chief campaigns.
